1.1 Executive Summary

"The Last Reflection" (الانعكاس الأخير) is a short psychological horror and supernatural thriller captured entirely on mobile smartphones in a vertical **9:16 aspect ratio** within two distinct domestic spaces across a border (Damascus and Beirut). In each room, a solitary man stands before a wardrobe mirror, only to realize that his reflection has severed its optical obedience. Designed as an executable production bible, every shot has been mathematically choreographed with exact camera geometry, sound calibration, Remotion programmatic compositing, and targeted AI relighting passes.

> ***The Logline:*** *"Two parallel rooms, two mirrors, and reflections that stop obeying their owners. What begins as a half-second latency escalates into an eerie, synchronized communication between the mirrors across both houses."*

1.2 The Core Premise & Narrative Arc

Khalil waves his hand; his reflection responds half a second late. The reflection finishes a gesture Khalil never made, then smiles on its own. In another city, Yazed experiences the exact same anomaly at the exact same fraction of a second. What starts as a perceived streaming lag reveals an unsettling truth: the reflections are communicating with one another through the glass, while the physical men remain isolated in their bedrooms.

1.3 The 7-Step Tension Curve (No Dead Moments)

STEP	DRAMATIC FUNCTION	ON-SCREEN ACTION	TIMECODE & SHOTS
1. The Hook	Uncanny Anomaly	A simple hand wave; reflection lags behind by 0.5s.	0:00.0 – 0:03.5 (S01)
2. Scrutiny	Audience Tries to Rationalize	Approaching glass, tapping finger, reflection continues moving independently.	0:03.5 – 0:10.0 (S02–S04)
3. Escalation	Independent Will	Khalil remains expressionless; the reflection breaks into an intentional smile.	0:10.0 – 0:14.0 (S05)
4. Convergence	Not an Isolated Event	Cut to Yazed in another house: identical smile, grip, synchronized turns.	0:14.0 – 0:27.0 (S06–S09)
5. Spatial Rift	Cross-Mirror Dialogue	Walking into hallways; mirror reflections gesture and mimic each other across sets.	0:27.0 – 0:50.0 (S10–S15)
6. Climax	Existential Retreat	Reflections step backwards into the mirror's infinite depth; absolute silence.	0:50.0 – 0:58.8 (S16–S18)
7. The Twist	Reality Inversion	Both men leave the room. The mirrors now reflect each other directly. Blackout. The knock.	0:58.8 – 1:23.3 (S19–S22)

Format: Short executive screenplay. Every scene is strictly mapped to shot numbers and timecodes. No dialogue occurs until the final blackout.

Scene 1: Interior. Khalil's Bedroom — Night (0:00.0 – 0:14.0 · S01–S05)

A quiet room with a single dim, cold practical light source. A vertical mirror hangs on the wall. KHALIL stands before it.

Khalil waves his left hand once. His reflection waves after him with a distinct half-second delay. He narrows his eyes, leaning in closer. He reaches out his index finger; a faint metallic click is heard before his finger touches the glass. He freezes completely. Inside the mirror, his reflection raises its hand to its own hair, adjusts it, and slowly smiles. Khalil's face remains frozen in fear.

Scene 2: Interior. Yazed's Bedroom — Night (0:14.0 – 0:27.0 · S06–S09)

A different house, across the border. A mirror sits on the opposite wall. YAZED stands rigidly still.

Yazed's reflection already wears the exact same unnerving smile. Yazed grips his knuckles tightly until they turn white; the reflection's fist clenches half a second later. Yazed turns his head away toward the door; his reflection turns in the exact opposite direction, gazing into the shadows behind Yazed.

Scene 3: Interior. The Parallel Hallways — Night (0:27.0 – 0:50.0 · S10–S15)

Khalil backs into his dark hallway, glancing over his shoulder. The reflection does not follow him; it stays centered in the glass, touching its own jawline as if feeling its skin for the first time.

Cut to Yazed's hallway: Yazed backs away, and his reflection mirrors the exact gesture seen in Khalil's mirror. Behind both reflections in the glass, an indistinct shadow slips across the background—a presence that does not exist in the physical bedrooms.

Scene 4: Interior. The Retreat & Inhale (0:50.0 – 0:58.8 · S16–S18)

Khalil and Yazed both reach for their bedroom doorknobs. In both mirrors, the reflections do not move toward the doors. Instead, they take three deliberate steps backwards into the dark, impossible depth of the mirrors, retreating into the glass like travelers sinking into deep water.

A sharp, collective intake of breath (The Inhale) cuts through the silence, followed by absolute auditory null (-46 dBFS room tone).

Scene 5: Interior. Face to Face (0:58.8 – 1:15.0 · S21)

Khalil walks out of his room into the darkness. Yazed walks out of his room into the darkness. The physical bedrooms are now empty.

The camera captures the mirrors. But the mirrors do not show empty bedrooms. Khalil's mirror now directly reflects Yazed's bedroom. Yazed's mirror reflects Khalil's bedroom. The two reflections are standing face to face through the glass, separated no longer by border checkpoints or geography, but united inside the glass.

Scene 6: Blackout, Dialogue & The Knock (1:15.0 – 1:23.3 · S22)

Total visual blackout. Pitch darkness.

> **KHALIL'S VOICE (over phone speaker, heavy static):**
> "Yazed... did you see that? The latency... the border latency is half a second."

YAZED'S VOICE (distorted, whisper):
"Khalil... I left the room. Who is standing in front of you?"

[ONE SHARP, LOUD METALLIC KNOCK ON HOLLOW GLASS: -3 dBFS. SILENCE.]

03 CORE SHOOTING & TWO-LAYER MIRROR TECHNIQUE

3.1 The Architectural Principle

Every mirror latency shot in this production relies on an economical, zero-optical-distortion method: **The physical actor and room are captured in Take A; the reflection is captured in Take B**. The two passes are combined with a polygon mask locked to the mirror frame.

> **The Two-Layer Formula:**
> `Take A (Real Actor & Room) + [Take B (Reflection Only) Masked via Glass Polygon & Shifted by +15 Frames] = Flawless Physical Paradox`

3.2 Rigging & Exposure Locking Protocol

1. **Zero-Movement Camera Anchor:** The phone MUST be clamped onto a heavy shelf or weighted book stack. Standard tripods with fluid heads are forbidden because touching the screen to start recording causes micro-shakes that ruin polygon mask registration.
2. **AE/AF/WB Lock:** Auto-exposure, auto-focus, and auto-white-balance MUST be permanently locked. Any auto-adjustment during Take A or Take B creates visible boundary seams between the room and the mirror.
3. **No Room Alteration:** The actor films Take A (the real body movement). Without moving the phone or altering any light, the actor moves to the mirror side and records Take B (the reflection's independent choreography).
4. **Clean Plate Protocol:** At the start of every camera setup, record 5 seconds of the empty room with the phone locked on its anchor.

3.3 Standard Camera Setups

SETUP	FRAMING	CAMERA HEIGHT	SUBJECT DISTANCE	ANGLE & LENS	MIRROR POSITION
K1	Wide	~130 cm	~3.5 m	30–40° from mirror normal, 1x (26mm)	Right side of frame, full frame visible
K2	Medium	~140 cm	~1.8 m	Same eye-line as K1, 1x (26mm)	Right side of frame, waist-up framing
Y1	Wide	~130 cm	~3.5 m	Mirrored orientation to K1, 1x	Left side of frame
Y2	Medium	~140 cm	~1.8 m	Mirrored orientation to K2, 1x	Left side of frame, waist-up framing
H	Hallway	~120 cm	~4.0 m	Down the central corridor, 1x	At end of hallway in background

3.4 Programmatic Remotion Compositing Code (`MirrorLag.tsx`)

To eliminate manual timeline nudging and guarantee mathematically exact 15-frame offsets across 30fps footage, compositing is driven by React Remotion:

```
// MirrorLag.tsx — Programmatic Remotion Two-Layer Compositor import { AbsoluteFill, OffthreadVideo, Sequence, staticFile } from 'remotion'; // Pixel-perfect polygon mask coordinates for mirror glass boundary const GLASS_MASK = 'polygon(52% 14%, 94% 14%, 94% 76%, 52% 76%)'; export const MirrorLagComposite: React.FC<{ takeAVideo: string; takeBVideo: string; lagFrames: number; // Standard: 15 frames (0.50s at 30fps) }> = ({ takeAVideo, takeBVideo, lagFrames = 15 }) => { return ( <AbsoluteFill style={{ backgroundColor: '#000000' }}> {/* Base Layer: Real actor and room environment */} <OffthreadVideo src={staticFile(takeAVideo)} style={{ width: '100%', height: '100%', objectFit: 'cover' }} /> {/* Masked Reflection Layer with Calculated Temporal Offset */} <Sequence from={0}> <OffthreadVideo src={staticFile(takeBVideo)} startFrom={lagFrames} style={{ position:
```

```
'absolute', width: '100%', height: '100%', objectFit: 'cover', clipPath: GLASS_MASK, filter: 'brightness(0.92) contrast(1.04)', // Physical reflection loss }} /> </Sequence> </AbsoluteFill> ); };
```

Table 1: Production Master Grid (S01–S22)

SHOT	TIMECODE	DURATION	SCENE DESCRIPTION	LEAD	SETUP	VFX / COMPOSITE METHOD	AUDIO ARCHITECTURE
S01	0:00.0–0:03.5	3.5s	First Lag: Hand wave	Khalil	K1	Two-Layer Composite (+15f)	Room Tone (-46 dBFS), Glass tap
S02	0:03.5–0:05.0	1.5s	The Eyes: Leaning close	Khalil	K2	Relight Studio Pass L01	Sub-Bass Drone intro (55Hz)
S03	0:05.0–0:07.5	2.5s	Reflection Keeps Moving	Khalil	K1	Two-Layer Composite	Fabric rustle, Drone rise (-24 dBFS)
S04	0:07.5–0:10.0	2.5s	Fingertip on Glass	Khalil	K2	Macro Mirror Pass	Sharp metallic click before contact
S05	0:10.0–0:14.0	4.0s	The Smile (Autonomous will)	Khalil	K1	Facial Keyframing / Take B	Sub Drone swells to -18 dBFS
S06	0:14.0–0:18.0	4.0s	Yazed: Same Smile	Yazed	Y1	Mirrored Take B Composite	Abrupt acoustic tone shift
S07	0:18.0–0:21.0	3.0s	Yazed's Clenched Fist	Yazed	Y2	Two-Layer Composite (+15f)	Bone creak, joint tension foley
S08	0:21.0–0:24.0	3.0s	Reflection Turns Away	Yazed	Y1	Full Body Rotation Take B	Air pressure drop
S09	0:24.0–0:27.0	3.0s	Khalil: Reflection Turns	Khalil	K1	Synchronized Rotation	Low-pass filter cuts highs
S10	0:27.0–0:31.0	4.0s	Hallway: Khalil steps back	Khalil	H	Depth Stacking Composite	Footstep scuff on floor
S11	0:31.0–0:35.0	4.0s	Hallway: Yazed steps back	Yazed	H	Mirrored Hallway Composite	Rhythmic wooden floor creak
S12	0:35.0–0:39.0	4.0s	Reflection Touches Face	Khalil	K2	Independent Take B Face Touch	Skin-on-skin friction foley
S13	0:39.0–0:43.0	4.0s	Yazed: Mirrored Gesture	Yazed	Y2	Synchronous Touch Pass	Binaural stereo panning
S14	0:43.0–0:46.5	3.5s	Shadow Behind Reflection	Khalil	K1	AI Shadow Layer Injection	Sub-55Hz rumble increases
S15	0:46.5–0:50.0	3.5s	Yazed: Same Shadow	Yazed	Y1	Matched AI Shadow Pass	High-frequency static whine
S16	0:50.0–0:54.0	4.0s	Reflection Steps Back into Depth	Khalil	K1	Infinite Depth Composite	Acoustic reverb expansion
S17	0:54.0–0:57.5	3.5s	Yazed: Retreat into Depth	Yazed	Y1	Matched Infinite Retreat	Sound suction effect
S18	0:57.5–0:58.8	1.3s	The Inhale (The Silence)	Both	K2/Y2	Freeze-frame breath cue	Sharp audible gasp, sudden mute
S19	0:58.8–1:05.0	6.2s	Khalil Leaves the Room	Khalil	K1	Empty room vs Active Mirror	Distanced hollow footfall

SHOT	TIMECODE	DURATION	SCENE DESCRIPTION	LEAD	SETUP	VFX / COMPOSITE METHOD	AUDIO ARCHITECTURE
S20	1:05.0–1:11.0	6.0s	Yazed Leaves the Room	Yazed	Y1	Empty room vs Active Mirror	Door latch click
S21	1:11.0–1:17.0	6.0s	Face to Face (Rift Convergence)	Both	Special	Dual Mirror Portal Composite	Deep harmonic drone (55Hz + 110Hz)
S22	1:17.0–1:23.3	6.3s	Blackout, Phone Dialogue, Knock	Both	Audio	Full Screen Blackout	Dialogue (-16 LUFS), Knock (-3 dBFS)

05 COMPREHENSIVE STORYBOARD & DETAILED SHOT BREAKDOWN

The following 22 execution cards contain the complete geometric, performance, compositing, and audio blueprint for every shot in the film.

SHOT 01 — First Lag

0:00.0 – 0:03.5 (3.5s)

LEAD & SETUP: **Khalil** · K1 (Wide, ~130cm height, 3.5m distance, 30-40° angle)

ACTION: Khalil stands before the mirror and waves his left hand once. His reflection waves back half a second late (+15 frames).

FRAMING: Mirror on right, full glass perimeter visible. Room door visible in deep background.

TAKE A (REAL): Full continuous take: 2s static stand -> single slow shoulder-height wave -> freeze hand for 1s -> lower hand -> 2s static.

TAKE B (REFLECTION): Identical framing, no changes in lighting. Actor performs reflection wave offset.

VFX COMPOSITE: Two-Layer Mirror Composite (+15 frames delay on glass polygon). Relight Pass L01.

AUDIO DESIGN: Room tone floor (-46 dBFS). Faint metallic glass click (-34 dBFS) at start of lagged motion.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] S01 composite (9:16, 4K/30 downscaled to 1080p). Cold practical key from camera-left (6000K, teal-grey spill), deep shadows, reflection 0.3 stop darker, native sensor noise.
```

SHOT 02 — The Eyes (Extreme Close Scrutiny)

0:03.5 – 0:05.0 (1.5s)

LEAD & SETUP: **Khalil** · K2 (Medium Close-Up, ~140cm height, 1.8m distance)

ACTION: Khalil leans in close to the glass, eyes locked onto the reflection's pupils. Subtle frown of realization.

FRAMING: Tight on face and mirror plane. Shallow depth of field focusing on real eyelashes.

TAKE A (REAL): Actor leans forward 15cm smoothly without jerking, pauses, eyes scanning reflection.

TAKE B (REFLECTION): Reflection leans in but stops 5cm earlier, breaking spatial geometry.

VFX COMPOSITE: Sub-pixel polygon tracking on mirror frame. Micro-stabilization.

AUDIO DESIGN: Infrasound Sub-Bass Drone intro at 55Hz (-38 dBFS). Actor's soft respiratory inhale.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L02] Focus on eye catchlights. Mirror catchlight slightly delayed and dimmer. Skin texture intact, no beauty smoothing.
```

SHOT 03 — Reflection Keeps Moving

0:05.0 – 0:07.5 (2.5s)

LEAD & SETUP: **Khalil** · K1 (Wide, waist-up framing)

ACTION: Khalil stops all physical movement and remains completely motionless. Inside the glass, the reflection continues moving its hand upward toward its collar.

FRAMING: Wide room view; absolute stillness in physical space contrast with fluid movement in the mirror.

TAKE A (REAL): Actor holds completely frozen posture for 4 seconds.

TAKE B (REFLECTION): Actor performs hand-to-collar adjustment with deliberate autonomy.

VFX COMPOSITE: Hard polygon split between real body and reflection glass.

AUDIO DESIGN: Fabric rustle foley originating strictly from mirror's stereo panning position.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] Consistent night room lighting, keep moving hand sharp, no motion smear or temporal jitter.
```

SHOT 04 — Fingertip on Glass

`0:07.5 – 0:10.0 (2.5s)`

LEAD & SETUP: **Khalil** · K2 (Macro / Close Hand Framing)

ACTION: Khalil extends his index finger toward the glass. Before his skin touches the surface, a metallic tap is heard, and the reflection's finger taps the glass from the inside.

FRAMING: Extreme close-up on the boundary between fingertip and its optical reflection.

TAKE A (REAL): Finger approaches glass slowly, halting 2mm before contact.

TAKE B (REFLECTION): Reflection finger taps glass firmly, leaving an impossible condensation smudge.

VFX COMPOSITE: Condensation bloom pass added to glass interior.

AUDIO DESIGN: Sharp, resonant metallic glass click (-22 dBFS) occurring 12 frames prior to physical contact.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L03] Macro lens texture, subtle internal glass refraction and edge condensation.
```

SHOT 05 — The Smile

`0:10.0 – 0:14.0 (4.0s)`

LEAD & SETUP: **Khalil** · K1 (Medium Wide)

ACTION: Khalil's face remains strictly terrified and expressionless. Slowly, his reflection curves into a broad, chilling smile that reaches its eyes.

FRAMING: Both real face and reflection face clearly visible in profile and reflection.

TAKE A (REAL): Static, stone-faced dread. No facial movement.

TAKE B (REFLECTION): Slow, sinister, controlled smile holding for 2.5 seconds.

VFX COMPOSITE: Composite seam verification along jawline; zero spill into physical cheek.

AUDIO DESIGN: Sub-Bass Drone swells to -18 dBFS. Tension curve steepens.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] The reflection's smile must cast an unnatural specular highlight across its upper teeth while the physical actor stays in deep shadow.
```

SHOT 06 — Yazed: The Same Smile

`0:14.0 – 0:18.0 (4.0s)`

LEAD & SETUP: **Yazed** · Y1 (Wide Mirrored Setup, Beirut apartment)

ACTION: Hard cut across the border to Yazed's bedroom. Yazed stands rigid before his mirror. His reflection already wears the identical chilling smile.

FRAMING: Mirror on left, door in background, colder blue practical light.

TAKE A (REAL): Yazed in petrified stillness.

TAKE B (REFLECTION): Reflection holding the identical synchronized smile.

VFX COMPOSITE: Mirrored polygon mask on left-hand mirror. Color grading matched to Beirut set.

AUDIO DESIGN: Abrupt acoustic shift: different room impulse response, drone modulates by half-step.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L04] Beirut apartment: colder teal wash (6500K), darker shadows, matched reflection luminescence.
```

SHOT 07 — Yazed's Clenched Fist

`0:18.0 – 0:21.0 (3.0s)`

LEAD & SETUP: **Yazed** · Y2 (Medium Close-Up)

ACTION: Yazed balls his right hand into an aggressive fist to test his own control. The reflection waits 0.5s before clenching its fist, but does so with crushing force.

FRAMING: Waist framing showing both physical arm and mirror reflection arm.

TAKE A (REAL): Physical fist clenches with white knuckles.

TAKE B (REFLECTION): Reflection clenches +15 frames late, then slowly rotates fist toward viewer.

VFX COMPOSITE: Two-Layer Composite with temporal offset.

AUDIO DESIGN: Subtle leather/fabric strain and knuckle pop foley (-28 dBFS).

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L04] High local contrast on knuckle tendons and tense forearm muscles.
```

SHOT 08 — Reflection Turns Away

0:21.0 – 0:24.0 (3.0s)

LEAD & SETUP: **Yazed** · Y1 (Wide)

ACTION: Yazed turns his head away from the mirror toward the hallway. In the mirror, his reflection turns in the opposite direction, peering into the dark corner behind Yazed.

FRAMING: Wide frame capturing both physical back-of-head and reflection's turned profile.

TAKE A (REAL): Yazed rotates head left toward hallway.

TAKE B (REFLECTION): Reflection rotates head right into dark bedroom depth.

VFX COMPOSITE: Complete divergent rotation composite.

AUDIO DESIGN: Air pressure drop effect; room tone momentarily thins out.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L04] Preserve exact neck muscle anatomy while reflection looks into deep room shadows.
```

SHOT 09 — Khalil: Synchronized Rotation

0:24.0 – 0:27.0 (3.0s)

LEAD & SETUP: **Khalil** · K1 (Wide)

ACTION: Back in Damascus, Khalil turns his head. Simultaneously, his reflection turns away—mirroring the exact angle of Yazed's reflection in Shot 08.

FRAMING: Matched geometric composition to S08.

TAKE A (REAL): Khalil turns head right toward his corridor.

TAKE B (REFLECTION): Reflection turns left into room corner.

VFX COMPOSITE: Cross-cutting rhythmic match between Damascus and Beirut.

AUDIO DESIGN: Low-pass filter sweeps down, muffling ambient room noise.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] Matched shadow depth between S08 and S09.
```

SHOT 10 — Hallway: Khalil Steps Back

0:27.0 – 0:31.0 (4.0s)

LEAD & SETUP: **Khalil** · H (Down Hallway looking back at bedroom mirror)

ACTION: Khalil retreats out of his bedroom into the hallway. Through the open bedroom door, the mirror is still visible in the background. The reflection does not retreat.

FRAMING: Long corridor perspective, bedroom doorway framing the illuminated mirror.

TAKE A (REAL): Actor walks backwards into foreground hallway.

TAKE B (REFLECTION): Reflection remains anchored in center of glass.

VFX COMPOSITE: Doorway portal composite with depth-of-field separation.

AUDIO DESIGN: Distant wooden floorboard creak in foreground; silence in background mirror.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L05] Hallway is in near-total darkness; only bedroom doorway emits cold light.
```

SHOT 11 — Hallway: Yazed Steps Back

0:31.0 – 0:35.0 (4.0s)

LEAD & SETUP: **Yazed** · H (Beirut Hallway)

ACTION: Yazed steps back into his own dark hallway. His mirror reflection also stays behind, perfectly centered in the glass frame.

FRAMING: Matched long corridor perspective from Beirut apartment.

TAKE A (REAL): Yazed backs away slowly into shadow.

TAKE B (REFLECTION): Reflection stands motionless in mirror.

VFX COMPOSITE: Matched corridor depth composite.

AUDIO DESIGN: Echoing corridor reverb; drone frequency drops to 50Hz.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L05] Consistent darkness in foreground corridor.
```

SHOT 12 — Reflection Touches Its Face

0:35.0 – 0:39.0 (4.0s)

LEAD & SETUP: **Khalil** · K2 (Medium Close-Up on Mirror Only)

ACTION: With Khalil absent from the room, the reflection slowly raises its fingers to its jawline, tracing its bone structure as if exploring an unfamiliar vessel.

FRAMING: Empty bedroom in real foreground; reflection alone inside the glass.

TAKE A (REAL): Clean plate of empty bedroom.

TAKE B (REFLECTION): Actor in mirror performs tactile face-touch choreography.

VFX COMPOSITE: Full extraction of reflection into empty clean plate.

AUDIO DESIGN: Soft skin-on-skin friction foley, uncomfortably close in the mix.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] The reflection is now an independent entity inhabiting the mirror space. Maintain physical realism.
```

SHOT 13 — Yazed: Mirrored Gesture

0:39.0 – 0:43.0 (4.0s)

LEAD & SETUP: **Yazed** · Y2 (Medium Close-Up on Mirror Only)

ACTION: In Beirut, Yazed's reflection performs the exact same jawline trace at the exact same velocity. The two reflections are in complete physical telepathy.

FRAMING: Matched mirror-only framing.

TAKE A (REAL): Clean plate of empty Beirut room.

TAKE B (REFLECTION): Yazed performs matched jawline trace.

VFX COMPOSITE: Synchronous gesture composite.

AUDIO DESIGN: Binaural stereo panning: Khalil's face touch on left channel, Yazed's on right channel.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L04] Matched timing and velocity to S12.
```

SHOT 14 — Shadow Behind Reflection

0:43.0 – 0:46.5 (3.5s)

LEAD & SETUP: **Khalil** · K1 (Wide)

ACTION: Behind Khalil's reflection in the glass, the dark corner of the bedroom shifts. A tall, amorphous silhouette slides along the back wall inside the mirror.

FRAMING: Deep background inside mirror.

TAKE A (REAL): Clean room background.

TAKE B (REFLECTION): Shadow element tracking on rear wall.

VFX COMPOSITE: Controlled AI shadow injection on mirror background only. Zero alteration of real room.

AUDIO DESIGN: Deep sub-55Hz bass oscillation swells to -15 dBFS.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L06] Subtle silhouette movement in mirror background: slow, deliberate, no grotesque warping, natural shadow density.
```

SHOT 15 — Yazed: The Same Shadow

0:46.5 – 0:50.0 (3.5s)

LEAD & SETUP: **Yazed** · Y1 (Wide)

ACTION: In Yazed's mirror, the identical silhouette passes behind his reflection from right to left, moving between the two houses as if connected by a subterranean doorway.

FRAMING: Matched deep mirror perspective.

TAKE A (REAL): Clean room background.

TAKE B (REFLECTION): Shadow element tracking.

VFX COMPOSITE: Matched shadow pass connecting both mirror worlds.

AUDIO DESIGN: High-frequency electromagnetic static whine creeps into the audio spectrum.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L06] Identical silhouette scale and transit velocity as S14.
```

SHOT 16 — Reflection Steps Back into Depth

0:50.0 – 0:54.0 (4.0s)

LEAD & SETUP: **Khalil** · K1 (Wide)

ACTION: Khalil's reflection takes three deliberate steps backward into the mirror. The mirror space appears to expand infinitely, extending into an impossible dark void.

FRAMING: Wide perspective on wardrobe mirror.

TAKE A (REAL): Physical room unchanged.

TAKE B (REFLECTION): Actor walks backward 6 steps away from camera plane.

VFX COMPOSITE: Depth scaling composite: reflection diminishes in size as mirror depth expands.

AUDIO DESIGN: Acoustic reverb on room tone expands dramatically, simulating a massive cavern.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] The reflection recedes into dark spatial depth; room illumination falls off realistically.
```

SHOT 17 — Yazed: Retreat into Depth

0:54.0 – 0:57.5 (3.5s)

LEAD & SETUP: **Yazed** · Y1 (Wide)

ACTION: Yazed's reflection recedes into the depths of its own mirror at the exact same stride, fading into dark background obscurity.

FRAMING: Matched wide framing in Beirut.

TAKE A (REAL): Physical room static.

TAKE B (REFLECTION): Actor walks backward into depth.

VFX COMPOSITE: Matched infinite depth composite.

AUDIO DESIGN: Auditory suction effect; low frequencies compress inward.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L04] Matched retreat velocity to S16.
```

SHOT 18 — The Inhale (The Silence)

0:57.5 – 0:58.8 (1.3s)

LEAD & SETUP: **Both** · K2 / Y2 Split Macro

ACTION: Simultaneous extreme close-up of both real actors' faces in their dark hallways. Both men inhale sharply in unison. Absolute silence drops like a guillotine.

FRAMING: Dual split or rapid cut on wide eyes and parted lips.

TAKE A (REAL): Sharp, authentic physical gasp.

TAKE B (REFLECTION): N/A (Real actors only).

VFX COMPOSITE: Zero effects. Pure physical performance.

AUDIO DESIGN: Sharp, loud collective gasp (-12 dBFS), immediately followed by DEAD SILENCE.

```
PROMPT: N/A — Raw physical capture.
```

SHOT 19 — Khalil Leaves the Room

0:58.8 – 1:05.0 (6.2s)

LEAD & SETUP: **Khalil** · K1 (Wide)

ACTION: Khalil reaches out, grabs his coat, and exits through the front door of his apartment. The bedroom mirror sits completely still.

FRAMING: Empty bedroom, hallway door closes.

TAKE A (REAL): Actor exits frame, bedroom door clicks shut.

TAKE B (REFLECTION): Clean room plate.

VFX COMPOSITE: Continuous real-time pass.

AUDIO DESIGN: Heavy apartment front door closes with solid deadbolt latch.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01] Static empty room, moonlight spill through curtains.
```

SHOT 20 — Yazed Leaves the Room

1:05.0 – 1:11.0 (6.0s)

LEAD & SETUP: **Yazed** · Y1 (Wide)

ACTION: Yazed turns his apartment key in the front door and exits into the night. His bedroom is now fully empty.

FRAMING: Empty Beirut bedroom.

TAKE A (REAL): Actor exits, door shuts.

TAKE B (REFLECTION): Clean room plate.

VFX COMPOSITE: Continuous real-time pass.

AUDIO DESIGN: Key jingle and deadbolt latch.

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L04] Static empty room in Beirut.
```

SHOT 21 — Face to Face (The Rift Convergence)

1:11.0 – 1:17.0 (6.0s)

LEAD & SETUP: **Both** · Special Center Mirror Alignment

ACTION: Both bedrooms are empty. Suddenly, inside Khalil's mirror, Yazed's reflection steps forward. Inside Yazed's mirror, Khalil's reflection steps forward. The two reflections are now standing face to face across the glass, having swapped rooms.

FRAMING: Direct center alignment on glass surface.

TAKE A (REAL): Khalil reflection pass.

TAKE B (REFLECTION): Yazed reflection pass composited into opposite glass.

VFX COMPOSITE: Portal compositing: Cross-projecting Beirut reflection into Damascus mirror.

AUDIO DESIGN: Deep dual-frequency harmonic drone (55Hz fundamental + 110Hz overtone).

```
PROMPT: [RELIGHT STUDIO — LOOK PASS L01/L04 COMBINED] Seamless environmental fusion between Damascus and Beirut interior reflections.
```

SHOT 22 — Blackout, Phone Dialogue & The Knock

1:17.0 – 1:23.3 (6.3s)

LEAD & SETUP: **Both** · Visual Blackout

ACTION: Instant cut to 100% black screen. A phone call connects through heavy cellular static. Khalil and Yazed speak across the border. A thunderous knock on glass terminates the film.

FRAMING: Absolute black (0,0,0).

TAKE A (REAL): Audio voiceover recording.

TAKE B (REFLECTION): Foley impact recording.

VFX COMPOSITE: Pure digital black screen. No credits until knock decays.

AUDIO DESIGN: Cellular phone EQ (-16 LUFS dialogue). Single metallic fist knock on hollow glass peaking at -3 dBFS. Reverb decay over 4 seconds.

```
PROMPT: N/A — Audio-driven finale.
```

06 AI PROCESSING & LOOK PASS ARCHITECTURE

6.1 Strict Generative Boundaries (The Non-Negotiable Rules)

To preserve authentic cinematic suspension of disbelief, generative AI is restricted strictly to **relighting and micro-environmental transformation**. The following boundaries are mandatory:

- **NO Face Morphing:** The real faces, skin textures, hair geometry, and identities of Khalil and Yazed must remain 100% unaltered.
- **NO Synthetic Re-posing:** The physical performance captured on camera dictates all motion; AI is never used to fabricate body gestures or limb positions.
- **NO Hallucinated Room Geometry:** Furniture, door frames, and mirror glass boundaries must match the physical shooting sets down to the single pixel.
- **Temporal Coherence:** When running Look Passes on image sequences, seed locking and optical flow guidance must prevent any inter-frame flicker or crawling textures.

6.2 Look Pass Directory (L01 through L06)

PASS ID	TARGET ENVIRONMENT	COLOR & LIGHTING PARAMETERS	APPLIED SHOTS
Look L01	Damascus Bedroom (General)	Cold practical key (6000K, teal-grey spill), deep shadows, reflection 0.3 stop darker than physical body.	S01, S03, S05, S09, S12, S16, S19
Look L02	Extreme Close-Up Scrutiny	Micro-contrast on iris catchlights; reflection catchlight delayed and suppressed by 40%.	S02, S18
Look L03	Macro Glass Boundary	Internal glass refraction, green edge tint, subtle condensation bloom around contact point.	S04
Look L04	Beirut Bedroom (General)	Colder blue ambient wash (6500K), harsher shadow drop-off, desaturated cool skin tones.	S06, S07, S08, S13, S17, S20
Look L05	Hallway & Corridor Depth	Near-total black foreground; bedroom doorway acts as a sharp architectural light spill.	S10, S11
Look L06	Silhouette & Rift Incursion	Shadow density matched to real room shadows; soft edge blur, zero geometric distortion.	S14, S15, S21

07 PRODUCTION TOOLKIT & HARDWARE PIPELINE

7.1 Camera, Grip & Hardware Matrix

PRODUCTION PHASE	HARDWARE & EQUIPMENT	OPERATIONAL CONFIGURATION
Primary Capture	Modern Smartphone (iPhone 14/15 Pro or Samsung S23/S24 Ultra)	Native Camera App or Blackmagic Camera App. Mode: 4K at 30.00 fps. AE/AF/WB locked permanently.
Camera Rigging	Zero-flex shelf clamp or heavy weighted book stack anchor	Rig must not flex when tapping record. Zero tripod sway. Floor taped for actor marks.
Lighting Unit	Single portable dimmable LED panel (or diffused phone flashlight)	Low-angle camera-left placement, 5600K–6000K, diffused through frosted paper or grid.
Audio Field Capture	External Lavalier / USB-C Condenser Microphone (Røde / DJI)	24-bit / 48kHz WAV recording. Room tone capture (60s silent profile) before takes.
Compositing & Code	Remotion (React Framework) & Adobe After Effects	Node.js 18+, Remotion CLI, polygon clip-paths, 32-bit linear color space.

08 COLOR GRADING & SENSOR TEXTURE PIPELINE

8.1 The Visual Philosophy: Night Sensor Realism

The film must never look like an over-produced commercial or slick glossy music video. It must feel like authentic, chilling private mobile footage leaked from an encrypted phone. Color grading adheres to three strict guidelines:

1. **Preserve Native Sensor Grain:** Do not apply heavy aggressive noise reduction. The natural high-ISO luminance grain of the smartphone sensor gives the image gritty psychological immediacy.
2. **Cold Teal-Grey Tonal Spectrum:** The color palette is stripped of warm yellows and oranges. Midtones are pushed toward cold teal-grey (`#4a5b68`); shadows are deep obsidian with a slight cool lift.
3. **Physical Mirror Photometrics:** Optical mirrors absorb 8% to 15% of incident light. In every composited shot, the reflection layer is graded 0.3 to 0.5 EV darker than the physical room, with slightly elevated contrast.

09 CINEMA-GRADE PSYCHOACOUSTIC SOUND DESIGN

9.1 Broadcast Calibrated Loudness Standards

AUDIO LAYER	CALIBRATED LEVEL	SONIC CHARACTER & SPATIAL PLACEMENT
Dialogue (S22)	**-16.0 LUFS** (Integrated)	Cellular telephone bandpass filter (300Hz–3.4kHz), mono center, subtle line dropouts.
The Final Knock (S22)	**-3.0 dBFS** (True Peak)	Sudden explosive impact, dry metallic knock on hollow glass, 4.0s sub-bass tail.
Room Tone Floor	**-46.0 dBFS**	Continuous background air, domestic refrigerator hum in Damascus, distant street rumble in Beirut.
Infrasound Sub Drone	**-22 to -14 dBFS**	Pure **55Hz sine wave** with gentle 110Hz second harmonic. Induces visceral physical unease.
Foley Transients	**-26 to -18 dBFS**	Skin-on-glass taps, fabric scuffs, door latch mechanical snaps. Hard-panned to match mirror screen position.

10 EDITING, PACING & ASSEMBLY PROTOCOL

10.1 Mathematical Cut Points

Every cut in "The Last Reflection" is timed to the exact frame to control audience eye-tracking across the 9:16 mobile canvas:

- **Hard Cuts on Motion:** Cuts between Damascus (Khalil) and Beirut (Yazed) always occur on the apex of head turns or hand gestures to disguise cross-border spatial dislocation.
- **The 15-Frame Rule:** The latency between real body and reflection is locked to 15 frames at 30.00fps (exactly 0.50 seconds). Any variation destroys the perception of digital border lag.
- **The Silence Guillotine (S18):** Cut immediately after the sharp collective gasp. Zero audio tail, zero reverb, complete digital silence until S19.

11 PRACTICAL PRODUCTION ROADMAP & SCHEDULE

PHASE	TIMELINE	KEY DELIVERABLES & MILESTONES
Phase 1: Set Prep	Day 1 (Morning)	Glass cleaning, light angle calibration, floor tape anchoring for Set K (Damascus) and Set Y (Beirut).
Phase 2: Principal Capture	Day 1 (Night)	Capture 4K/30 Take A and Take B for S01–S10 (Khalil) and S06–S11 (Yazed). 3 takes per shot minimum. Clean plates recorded.
Phase 3: Hallway & Rift	Day 2 (Night)	Capture hallway setups, macro fingertip passes, and retreating depth choreography (S12–S21). Audio voiceover recording for S22.
Phase 4: Compositing	Day 3	Remotion automated composite generation, polygon mask refinement in After Effects, Look Pass AI passes applied.
Phase 5: Sound & Master	Day 4	55Hz sub drone integration, foley spatial panning, broadcast loudness normalization to -16 LUFS, final 9:16 ProRes 422 master export.

13 MASTER PRODUCTION CHECKLISTS

1. Pre-Shooting Checklist

✓ Mirror thoroughly cleaned with micro-fiber cloth; zero finger smudges before Take A.
✓ Camera anchor completely rigid; no tripod fluid head flex.
✓ AE/AF and White Balance permanently locked in camera application.
✓ Lighting locked to single cold source (5600K–6000K); zero stray window daylight.
✓ Actor clothing dark, solid color, zero logos, identical across all shooting days.

2. On-Set Capture Checklist

✓ 5 seconds of empty room Clean Plate recorded for every setup.
✓ Minimum 3 takes recorded for Take A and Take B.
✓ 2 seconds of motionless silence held before action and after action.
✓ Zero phone movement between Take A and Take B.

3. Post-Production & Delivery Checklist

✓ Remotion polygon mask aligned to glass frame; zero edge tearing.
✓ Temporal offset verified at exactly 15 frames (0.50 seconds).
✓ Final audio loudness integrated at -16.0 LUFS (+/- 0.5 LUFS).
✓ True peak of glass knock does not exceed -3.0 dBFS.
✓ 55Hz sub drone clean and mono-centered for mobile speaker compatibility.

14 FINAL COVERAGE AUDIT & HANDOFF SIGN-OFF

This executive production bible provides 100% complete coverage for all 22 shots of **"The Last Reflection" (الانعكاس الأخير)**. All parameters, timecodes, compositing scripts, and audio calibration benchmarks are certified for immediate field execution and international distribution.

EXECUTIVE ROLE	NAME	PRODUCTION RESPONSIBILITY	STATUS
Co-Director / Lead Writer	Khalil Khalil	Damascus Unit Direction, Lead Performance, Remotion Architecture	APPROVED & SIGNED
