PROFILE

Computer Science student and independent security researcher based in Homs, Syria. I research and document vulnerabilities, practise digital forensics and Linux/network analysis hands-on, and build web tools. Security and Linux are a learning-focused track, supported by research reports and public recognition. Fluent in Arabic and English.

EXPERIENCE

Web Developer & Technical Content Writer — 2022 - Present
Freelance, remote

- Built responsive portfolio and landing-page websites (HTML, CSS, JavaScript)
- Authored Arabic-language technical training materials on Linux and cybersecurity

Security Research: Race Condition Discovery — 2024
Independent research

- Documented a race condition vulnerability in an email confirmation workflow
- Produced a full technical report covering the exploit methodology and impact
- Highlighted by OffSec (March 2026)

RECOGNITION

Horizon Lab — Digital forensics

- Ranked #1 in Syria and #177 worldwide with a 93% score, using the Phoenix digital forensics tool

Favikon — Creator ranking

- Ranked #1 cybersecurity creator in Syria and in the Top 50 creators in the Arab world

PROJECTS

Phoenix — Digital forensics tool
