Khalil Khalil

AI Solutions Architecture | Vulnerability Research | Full-Stack Systems

Homs, Syria | khalilmkhalil0937@gmail.com | +963 960 955 844 | khalil-m-khalil.github.io

PROFILE

AI-native solutions architect and cybersecurity researcher combining legal analytical rigor (Bachelor of Law, HPU) with Computer Science studies (University of the People). Proven track record discovering critical logic vulnerabilities (Meta race condition recognized by OffSec), building local forensics utilities, and directing advanced LLMs to engineer deterministic prompt architectures, browser automation workflows, and production software.

EXPERIENCE

AI Solutions Architect & Systems Prototyper 2022 - Present
Freelance, remote
- Directed LLMs to engineer functioning Python, WebGL, and SQLite applications (Phoenix dashboard, Nabra keyboard utility, Sada noise calibrator).
- Designed automated browser execution workflows, high-volume data ingestion pipelines, and structured document synthesis.
- Authored open-source prompt architectures utilizing Chain-of-Thought (CoT) and structured JSON/XML schemas to eliminate hallucinations.

Independent Security Researcher 2024 - Present
Self-directed research
- Discovered and documented a critical race condition in Meta's OAuth/email confirmation workflow; highlighted by OffSec in March 2026.
- Conducted logic flaw testing via Burp Suite, open redirect evaluations, and OSINT digital forensics investigations.
- Provided confidential incident triage, unauthorized account takedowns, and digital extortion mitigation for individuals and creators.

Technical Training & Open-Source Protocols Ongoing
Independent, remote
- Engineered the open-source Career Roadmap and App Validation Protocols on GitHub, establishing reproducible AI evaluation gates.
- Mentored 100+ learners across cybersecurity fundamentals, web development, and applied AI workflows.

RECOGNITION & KEY PROJECTS

OffSec Highlight - Race condition research on a Meta platform highlighted in March 2026. Recognition
drive.google.com/drive/folders/1HXxHzGPUjzUS0UELDB2VLeCQS-KJ0T_A?usp=drive_link

Horizon Lab - Ranked #1 in Syria and #177 worldwide with 93% score in digital forensics using Phoenix. Forensics
drive.google.com/drive/folders/1fVV4dVbT0LvDbXnkb4AqCLJVFaOdKqos?usp=drive_link

Phoenix & Nabra - Local digital forensics verification dashboard and offline Windows bilingual keyboard utility. Software
khalil-m-khalil.github.io/Phoenix/

AI Protocols - Deterministic prompt architectures and agentic pipelines with 100+ research roadmaps. Open Source
github.com/Khalil-M-Khalil

EDUCATION

BSc Computer Science (in progress) 2023 - Present
University of the People (UoPeople), online

Bachelor of Law Graduated
Hawash Private University (HPU), Homs, Syria

TECHNICAL SKILLS & TOOLCHAIN

AI & Automation: Prompt Architecture | Chain-of-Thought (CoT) | Few-Shot Calibration | LLM Orchestration (Claude, GPT-4) | Structured Outputs (JSON/XML) | Browser & Data Automation

Security & Forensics: Vulnerability Research | Logic Flaws & Race Conditions | Burp Suite | Wireshark | Nmap | Sleuth Kit | Autopsy | Volatility 3 | Incident Triage

Development & Systems: Python | HTML5 | CSS3 | JavaScript | SQLite | WebGL | Linux / Debian | Git / GitHub

LINKS & LANGUAGES

Portfolio | GitHub | Training Proof | Research Archive

Languages: Arabic (Native) | English (Professional)
